Hassan

PROFILE

Computer Science graduate passionate about Machine Learning, AI, and Full Stack Development. Interested in building practical and user-focused solutions for real-world problems. Quick learner with strong problem-solving and adaptability skills. Looking for an opportunity to learn, contribute and grow in the technology field.

EXPERIENCE

Machine Learning & Generative AI Intern — Contriver

Feb 2026 – May 2026

Completed a 3-month internship in Machine Learning, Generative AI, and Full-Stack Development with hands-on project experience.

Internship Projects

Train Delay Propagation Model

2026

- Engineered an ML-driven train delay prediction system to analyze delays and recommend alternative transportation options.
- Improved travel planning efficiency by up to 40% through intelligent delay forecasting.

Product Description Generator

2026

- Architected a full-stack, machine learning based application for automated product description generation
- Reduced manual content effort by nearly 70% while accelerating product onboarding.

ACADEMIC PROJECTS

Smart Identification and Edibility Detection System

2025

- Orchestrated a deep learning-based system to identify fruits and vegetables, detect ripeness, provide nutritional guidance and warning alerts.
- Enhanced food quality evaluation efficiency by approximately 70% with Personalized guide.

Care Cloud — Donation Management Website

2024

- Spearheaded a digital platform connecting donors and beneficiaries to donate and track donations.
- Streamlined donation coordination by over 60% through centralized management.

Shortcut Key Saver

2024

- Crafted a interactive CRUD-based application for organizing and accessing all keyboard shortcuts.
- Improved shortcut retrieval speed by nearly 75%, boosting productivity.

Project Topic Recommendation System

2025

- Devised an intelligent platform that recommend personalized project topics with user-friendly features.
- Increased project discovery efficiency by nearly 65%, significantly reducing topic selection time.

TECHNICAL SKILLS

- Programming Languages:** Python, C, JavaScript
- Web and Backend Technologies:** HTML, CSS, React , REST APIs
- Databases:** MySQL, MongoDB
- Machine Learning / AI:** TensorFlow, OpenCV, Generative AI, TF-IDF, Recommendation Systems
- Tools & Platforms:** GitHub, VS Code, PyCharm, Jupyter Notebook, Apache, LaTeX, JFLAP

EDUCATION

Bachelor of Engineering — Computer Science & Engineering

2022 – 2026

Government Engineering College, M H Halli, Hassan

CGPA: 8.88

Higher Secondary Education (PCMB)

2020 – 2022

Brigade PU College, Hassan

93%

Secondary Education (SSLC)

2020

United Academy School, Belur, Hassan

88.48%

CERTIFICATIONS

- Data Analytics Job Simulation — Deloitte
- AI for Beginners — HP Life
- Introduction to Data Analytics — Simplilearn
- Introduction to Generative AI Studio — Google Cloud & Simplilearn SkillUp
- Python for Beginners — Simplilearn SkillUp
